

**PROCEEDINGS OF THE
2003 WINTER SIMULATION CONFERENCE**

Edited By

**STEPHEN E. CHICK
INSEAD**

**PAUL J. SÁNCHEZ
Naval Postgraduate School**

**DAVID FERRIN
Business Prototyping Inc.**

**DOUGLAS J. MORRICE
The University of Texas at Austin**

**Fairmont Hotel
New Orleans, LA, U.S.A.**

December 7-10, 2003

Preface

From the Editors	xxv
About the Editors	xxvii

About the Conference

Sponsoring Organizations	xxviii
WSC Board of Directors	xxix
WSC '03 Conference Committee	xxx
WSC '03 Program Structure and Track Coordinators	xxxi
Referees	xxxiii
Patrons of WSC	xxxvi
The Winter Simulation Conferences	xxxix

Keynote Address

Only Wet Babies Like Change	3
Stephen Shapiro	

Introductory Tutorials

Introduction to Simulation

Introduction to Modeling and Simulation	7
John S. Carson, II	

Input Modeling

Input Modeling	14
Lawrence Leemis	

Spreadsheet Simulation

Spreadsheet Simulation	25
Andrew F. Seila	

Tips for Successful Practice of Simulation

Tips for Successful Practice of Simulation	31
Deborah A. Sadowski and Mark R. Grabau	

Verification and Validation

Verification and Validation of Simulation Models	37
Robert G. Sargent	

Contents

Output Analysis

Analysis of Simulation Output	49
Marvin K. Nakayama	

Experimental Design for Simulation

Experimental Design for Simulation	59
W. David Kelton and Russell R. Barton	

Designing a Simulation Study

How to Conduct a Successful Simulation Study	66
Averill M. Law	

Simulation-Based Optimization

Practical Introduction to Simulation Optimization	71
Jay April, Fred Glover, James P. Kelly, and Manuel Laguna	

Advanced Tutorials

Quasi-Monte Carlo Methods in Practice

Quasi-Monte Carlo Methods for Simulation	81
Pierre L'Ecuyer	

Input Modeling

Input Model Uncertainty: Why Do We Care and What Should We Do About It?	90
Shane G. Henderson	

Selecting the Best System

Selecting the Best System: Theory and Methods	101
Seong-Hee Kim and Barry L. Nelson	

Inside Simulation Software

Inside Discrete-Event Simulation Software: How It Works and Why It Matters	113
Thomas J. Schriber and Daniel T. Brunner	

Parallel Simulation

Distributed Simulation Systems	124
Richard M. Fujimoto	

Call Center Simulations

Call Center Simulation Modeling: Methods, Challenges, and Opportunities	135
Vijay Mehrotra and Jason Fama	

Control Variate Techniques for Monte Carlo Simulation

Control Variates Techniques for Monte Carlo Simulation	144
Roberto Szechtman	

Verification, Validation, and Certification of Modeling and Simulation Applications

Verification, Validation, and Certification of Modeling and Simulation Applications	150
Osman Balci	

Contents

Advanced Event Scheduling Methodology

Advanced Event Scheduling Methodology	159
Lee W. Schruben, Theresa M. Roeder, Wai Kin Chan, Paul Hyden, and Mike Freimer	

Software/Modelware Tutorials A

ExpertFit Distribution-Fitting Software

How the ExpertFit Distribution-Fitting Software can make your Simulation Models more Valid	169
Averill M. Law and Michael G. McComas	

Simulation Modeling Using ProModel Technology

Simulation Modeling Using ProModel Technology	175
Charles R. Harrell and Rochelle N. Price	

Micro Saint Sharp Simulation Software

Micro Saint Sharp Simulation Software	182
Wendy K. Bloechle and Daniel Schunk	

Extend: An Interactive Simulation Tool

Extend: An Interactive Simulation Tool	188
David Krah	

Flexible Simulation (FlexSim) Software

FlexSim Simulation Environment	197
William B. Nordgren	

Maximizing Simulation ROI with AutoMod

Maximizing Simulation ROI with AutoMod	201
Matthew W. Rohrer	

The Arena Product Family: Enterprise Modeling Solutions

The Arena Product Family: Enterprise Modeling Solutions	210
Vivek Bapat and David T. Sturrock	

Object-Oriented Simulation with SML and Silk in Java and .Net

Object-Oriented Simulation with SML and Silk in .Net and Java	218
Richard A. Kilgore	

Towards Simulation-Based Business Process Management

Towards Simulation-Based Business Process Management	225
Jon H. Weyland and Michael Engiles	

Software/Modelware Tutorials B

Supply Chain Simulation Software I

Supply Chain Simulation and Analysis with SimFlex™	231
Edward J. Williams and Ali Gunal	

Contents

Supply Chain Simulation Software II

Benefits of Using a Supply Chain Simulation Tool to Study Inventory Allocation	238
Andrew J. Siprelle, David J. Parsons, and Robin J. Clark	

Risk Analysis

State of the Art Tutorial I: Simulation Modeling for Finance and Insurance

Applications of Simulation Models in Finance and Insurance	249
Thomas N. Herzog and Graham Lord	

State of the Art Tutorial II: Simulations for Financial Engineering

Efficient Simulations for Option Pricing	258
Jeremy Staum	

New Simulation Methodology for Risk Analysis

Importance Sampling for a Mixed Poisson Model of Portfolio Credit Risk	267
Paul Glasserman and Jingyi Li	
Rare-Event, Heavy-Tailed Simulations Using Hazard Function Transformations, with Applications to Value-at-Risk	276
Zhi Huang and Perwez Shahabuddin	
Genetic Programming with Monte Carlo Simulation for Option Pricing	285
N. K. Chidambaram	

Risk Analysis Software Tutorial I

Crystal Ball for Six Sigma Tutorial	293
Lawrence I. Goldman, Ethan Evans-Hilton, and Hilary Emmett	

Risk Analysis Software Tutorial II

OptFolio – A Simulation Optimization System for Project Portfolio Planning	301
Jay April, Fred Glover, and James P. Kelly	

New Simulation Methodology for Finance

Work Reduction in Financial Simulations	310
Jeremy Staum, Samuel Ehrlichman, and Vadim Lesnevski	
Efficient Simulation of Gamma and Variance-Gamma Processes	319
Athanassios N. Avramidis, Pierre L’Ecuyer, and Pierre-Alexandre Tremblay	
Duality Theory and Simulation in Financial Engineering	327
Martin B. Haugh	

Simulation Methodology for Collateralized Debt and Real Options

Simulation Methods for Risk Analysis of Collateralized Debt Obligations	335
William J. Morokoff	
Simulation and Optimization for Real Options Valuation	343
Barry R. Cobb and John M. Charnes	
A New Methodology to Evaluate the Real Options of an Investment Using Binomial Trees and Monte Carlo Simulation	351
Michele Amico, Zbigniew J. Pasek, Farshid Asl, and Giovanni Perrone	

Contents

Simulation for Risk Management

- A Simulation-Based Credit Default Swap Pricing Approach Under Jump-Diffusion 360
Tarja Joro and Paul Na
- Risk Management of a P/C Insurance Company Scenario Generation, Simulation and Optimization 364
John M. Mulvey and Hafize Gaye Erkan
- A Two-Component Spot Pricing Framework for Loss-Rate Guaranteed Internet Service Contracts 372
Aparna Gupta, Lingyi Zhang, and Shivkumar Kalyanaraman

Analysis Methodology

Simulation Input Modeling

- A Kernel Approach to Estimating the Density of a Conditional Expectation 383
Samuel G. Steckley and Shane G. Henderson
- Prior and Candidate Models in the Bayesian Analysis of Finite Mixtures 392
Russell C. H. Cheng and Christine S.M. Currie
- A Flexible Automated Procedure for Modeling Complex Arrival Processes 399
Michael E. Kuhl, Sachin G. Sumant, and James R. Wilson

Simulation Output Analysis

- Non-Stationary Queue Simulation Analysis Using Time Series 408
Rita Marques Brandão and Acácio M.O. Porta Nova
- Truncation Point Estimation Using Multiple Replications in Parallel 414
Falko Bause and Mirko Eickhoff
- A Wavelet-Based Spectral Method for Steady-State Simulation Analysis 422
Emily K. Lada, James R. Wilson, and Natalie M. Steiger

Simulation of Large Networks

- Modeling and Simulation of Telecommunication Networks for Control and Management 431
John S. Baras
- Efficient Simulation of the National Airspace System 441
John F. Shortle, Donald Gross, and Brian L. Mark
- Propagation of Uncertainty in a Simulation-Based Maritime Risk Assessment
Model Utilizing Bayesian Simulation Techniques 449
Jason R.W. Merrick, Varun Dinesh, Amita Singh, J. René van Dorp, and Thomas A. Mazzuchi

Indifference Zone Selection Procedures

- Inferences from Indifference-Zone Selection Procedures 456
E. Jack Chen and W. David Kelton
- Expected Opportunity Cost Guarantees and Indifference Zone Selection Procedures 465
Stephen E. Chick
- An Indifference-Zone Selection Procedure with Minimum Switching and Sequential Sampling 474
L. Jeff Hong and Barry L. Nelson

Special Topics on Simulation Analysis

- To Batch or Not to Batch 481
Christos Alexopoulos and David Goldsman

Contents

Better-than-Optimal Simulation Run Allocation?	490
Chun-Hung Chen, Donghai He, and Enver Yücesan	
Properties of Discrete Event Systems from their Mathematical Programming Representations	496
Wai Kin Chan and Lee W. Schruben	
<i>Queueing Network Simulation Analysis</i>	
Efficient Analysis of Rare Events Associated with Individual Buffers in a Tandem Jackson Network	503
Ramya Dhamodaran and Bruce C. Shultes	
Developing Efficient Simulation Methodology for Complex Queueing Networks	512
Ying-Chao Hung, George Michailidis, and Derek R. Bingham	
Queueing-Network Stability: Simulation-Based Checking	520
Jamie R. Wieland, Raghu Pasupathy, and Bruce W. Schmeiser	
<i>Efficient Simulation Procedures</i>	
Comparison with a Standard via Fully Sequential Procedures	528
Seong-Hee Kim	
A Simulation Study on Sampling and Selecting under Fixed Computing Budget	535
Loo Hay Lee and Ek Peng Chew	
Simulation-Based Retrospective Optimization of Stochastic Systems: A Family of Algorithms	543
Jihong Jin and Bruce Schmeiser	
<i>Issues on Simulation and Optimization I</i>	
Robust Simulation-Based Design of Hierarchical Systems	548
Charles D. McAllister	
Optimal Experimental Design for Systems Involving both Quantitative and Qualitative Factors	556
Navara Chantararat, Ning Zheng, Theodore T. Allen, and Deng Huang	
Controlled Sequential Bifurcation: A New Factor-Screening Method for Discrete-Event Simulation	565
Hong Wan, Bruce Ankenman, and Barry L. Nelson	
<i>Issues on Simulation and Optimization II</i>	
Some Issues in Multivariate Stochastic Root Finding	574
Raghu Pasupathy and Bruce W. Schmeiser	
Targeting Aviation Delay through Simulation Optimization	578
Frederick Wieland and Thomas Curtis Holden	
Robust Hybrid Designs for Real-Time Simulation Trials	585
Russell C. H. Cheng and Owen D. Jones	
Modeling Methodology A	
<i>Foundations of Multi-Paradigm Modeling and Simulation</i>	
Computer Automated Multi-Paradigm Modelling: Meta-Modelling and Graph Transformation	595
Hans Vangheluwe and Juan de Lara	
A Meta-Theoretic Approach to Modeling and Simulation	604
Mamadou K. Traoré	
A Port Ontology for Automated Model Composition	613
Vei-Chung Liang and Christiaan J.J. Paredis	

Contents

Hybrid Dynamic Systems

Mode Transition Behavior in Hybrid Dynamic Systems	623
Pieter J. Mosterman	
Relating Chi to Hybrid Automata	632
Bert van Beek, Nick G. Jansen, Koos E. Rooda, Ramon R.H. Schiffelers, Ka L. Man, and Michel A. Reniers	
Models for Continuous and Hybrid System Simulation	641
Mariana C. D'Abreu and Gabriel A. Wainer	

Simulation of Large Scale Networks I

Simulation of Large Scale Networks Using SSF	650
David M. Nicol, Jason Liu, Michael Liljenstam, and Guanhua Yan	
Modelling Differentiated Services in Conservative PDES	658
Roger Curry, Rob Simmonds, and Brian Unger	
Staged Simulation for Improving Scale and Performance of Wireless Network Simulations	667
Kevin Walsh and Emin Gün Sirer	

Simulation of Large Scale Networks II

Large-Scale Network Simulations with <i>GTNetS</i>	676
George F. Riley	
Modeling and Simulation Best Practices for Wireless Ad Hoc Networks	685
Luiz Felipe Perrone, Yougu Yuan, and David M. Nicol	
Development of an Internet Backbone Topology for Large-Scale Network Simulations	694
Michael Liljenstam, Jason Liu, and David M. Nicol	

Simulation of Large Scale Networks III

ROSS.Net: Optimistic Parallel Simulation Framework for Large-Scale Internet Models	703
David Bauer, Garrett Yaun, Christopher D. Carothers, Murat Yuksel, and Shivkumar Kalyanaraman	
Loosely-Coordinated, Distributed, Packet-Level Simulation of Large-Scale Networks	712
Boleslaw K. Szymanski and Yu Liu	
An Improved Computational Algorithm for Round-Robin Service	721
Jorge R. Ramos, Vernon Rego, and Janche Sang	

Visualization for Modeling and Simulation

A Taxonomy of Visualization Techniques for Simulation in Production and Logistics	729
Sigrid Wenzel, Jochen Bernhard, and Ulrich Jessen	
Visualization Methods for Time-Dependent Data – An Overview	737
Wolfgang Müller and Heidrun Schumann	
Problems of Visualization of Technological Processes	746
Pavel Slavik, Marek Gayer, Frantisek Hrdlicka, and Ondrej Kubelka	

Next Generation Modeling I

RUBE: A Customized 2D and 3D Modeling Framework for Simulation	755
Paul Fishwick, Jinho Lee, Minh Park, and Hyunju Shim	
Information Visualization Supporting Modelling and Evaluation Tasks for Climate Models	763
Thomas Nocke, Heidrun Schumann, Uwe Böhm, and Michael Flechsig	

Contents

Issues Using COTS Simulation Software Packages for the Interoperation of Models	772
Michael D. Ryde and Simon J.E. Taylor	
<i>Next Generation Modeling II – Applications</i>	
Experiencing Natural Phenomena with Virtual, Constructed and Mathematical Models	778
Stephan Diehl and Carsten Görg	
Improving the Development Process for Eukaryotic Cell Cycle Models with a Modeling Support Environment	782
Nicholas A. Allen, Clifford A. Shaffer, Marc T. Vass, Naren Ramakrishnan, and Layne T. Watson	
Modeling Control in Manufacturing Simulation	791
Durk-Jouke van der Zee	
<i>Next Generation Modeling III – Agents</i>	
Simulation for Testing Software Agents – An Exploration based on JAMES	799
Jan Himmelsbach, Mathias Röhl, and Adelinde M. Uhrmacher	
A Multi-Paradigm Simulator for Simulating Complex Adaptive Supply Chain Networks	808
Surya Dev Pathak, David M. Dilts, and Gautam Biswas	
SPADES – A Distributed Agent Simulation Environment with Software-in-the-Loop Execution	817
Patrick F. Riley and George F. Riley	
Modeling Methodology B	
<i>Distributed Simulation and Manufacturing</i>	
Distributed Simulation with COTS Simulation Packages	829
Csaba Attila Boer and Alexander Verbraeck	
Time Management Issues in COTS Distributed Simulation: A Case Study	838
Simon J.E. Taylor, Jon Sharpe, and John Ladbroke	
Synchronization and Management of Shared State in HLA-Based Distributed Simulation	847
Boon Ping Gan, Malcolm Yoke Hean Low, Junhu Wei, Xiaoguang Wang, Stephen John Turner, and Wentong Cai	
<i>Parallel Distributed Simulation and Modeling Methods</i>	
Causal Order based Time Warp: A Tradeoff of Optimism	855
Yi Zeng, Wentong Cai, and Stephen J. Turner	
An Algorithm for Fully-Reversible Optimistic Parallel Simulation	864
Michael D. Peters and Christopher D. Carothers	
SyncSim: A Synchronous Simple Optimistic Simulation Technique based on a Global Parallel Heap Event Queue	872
Sushil K. Prasad and Zhiyong Cao	
<i>Commercial-off-the-Shelf Distributed Simulation, Panel</i>	
HLA-CSPIF Panel on Commercial Off-the-Shelf Distributed Simulation	881
Simon J.E. Taylor, Boon Ping Gan, Steffen Straßburger, and Alexander Verbraeck	
<i>Simulation and Verification I</i>	
From Simulation to Verification (and Back)	888
Harald Rueß and Leonardo de Moura	
Design Environments for Complex Systems	897
Corrado Priami	

Contents

Formal Analysis of Air Traffic Management Systems: The Case of Conflict Resolution and Recovery	906
Ricky Butler, Jeffrey Maddalon, Alfons Geser, and César Muñoz	
Simulation and Verification II	
Event-Triggered Environments for Verification of Real-Time Systems	915
Darren Cofer and Murali Rangarajan	
From Timed Automata to DEVS Models	923
Norbert Giambiasi, Jean-Luc Paillet, and Frédéric Chêne	
Simulating Quantum Computing: <i>Quantum eXpress</i>	932
Kareem S. Aggour, Michael J. Simon, Renee Guhde, and Melvin K. Simmons	
Military Applications	
Military Keynote	
Wargames, Preemption and a Lot of Other Curious Behavior	943
James F. Dunnigan	
Agent Models I	
Action Models	944
Gary W. King, Clayton T. Morrison, and Paul R. Cohen	
Frequency-Based Designs for Terminating Simulations: A Peace-Enforcement Example	952
Susan M. Sanchez and Hsin-Fu Wu	
UTSAF: A Multi-Agent-Based Framework for Supporting Military-Based Distributed Interactive Simulations in 3D Virtual Environments	960
Joseph Manojlovich, Phongsak Prasithsangaree, Stephen Hughes, Jinlin Chen, and Michael Lewis	
Human Systems Modeling	
Specifying the Behavior of Computer-Generated Forces without Programming	969
Daniel Fu, Ryan Houlette, and Randy Jensen	
Fidelity and Validity: Issues of Human Behavioral Representation Requirements Development	976
Tom Hughes and Evan Rolek	
Assessing Technology Effects on Human Performance through Trade Space Development and Evaluation	983
Christopher R. Hale	
Agent Models II	
Search Theory, Agent-Based Simulation, and U-Boats in the Bay of Biscay	991
Lance Champagne, R. Greg Carl, and Raymond Hill	
Dynamic Path-Planning for Search and Destroy Missions – The Bay of Biscay Scenario	999
Subhashini Ganapathy and Raymond R. Hill	
Bay of Biscay: Extensions into Modern Military Issues	1004
Lance E. Champagne	
Logistics	
Simulation based Decision Support for Supply Chain Logistics	1013
Subhashini Ganapathy, S. Narayanan, and Krishnamurthy Srinivasan	
Impact of an Autonomic Logistics System (ALS) on the Sortie Generation Process	1021
Paul D. Faas and J. O. Miller	

Contents

T.LoADS Treatment of Assigning and Filling Orders	1026
Bob Hamber	
 <i>Emerging Areas: Urban Operations and UCAVs</i>	
Human Effectiveness Issues in Simulated Uninhabited Combat Aerial Vehicles	1034
Sasanka V. Prabhala, Jennie J. Gallimore, and S. Narayanan	
A Game Engine based Simulation of the NIST Urban Search and Rescue Arenas	1039
Jijun Wang, Michael Lewis, and Jeffrey Gennari	
Research Plan Development for Modeling and Simulation of Military Operations in Urban Terrain	1046
Thomas M. Cioppa, John B. Willis, Niki Deliman Goerger, and Lloyd P. Brown	
 <i>Simulation for Emergency Response</i>	
JTLS-JCATS Federation Support of Emergency Response Training	1052
Francis A. Bowers, III and David L. Prochnow	
Homeland Defense Center Network – Capitalizing on Simulation, Modeling and Visualization for Emergency Preparedness, Response and Mitigation	1061
Jack Corley and Dan Lejerskar	
A Framework for Modeling and Simulation for Emergency Response	1068
Sanjay Jain and Charles McLean	
 Appendix	
Author Index	A-3

VOLUME II

Military Applications, continued

Algorithms and Analyses

Piggy-Backed Time-Stepped Simulation with ‘Super-Stepping’	1077
S. C. Tay, G. S.H. Tan, and K. Shenoy	
Pre-Reckoning Algorithm for Distributed Virtual Environments	1086
Thomas P. Duncan and Denis Gracanin	
Simulation Modeling and Analysis in Support of Brigade Assault Bridging Operations Planning	1094
Patrick James Delaney	

Support to Decision Makers

Caveats for Simulation Modeling in Support of Decision Making	1102
Christopher M. Hill and Linda C. Malone	
Evaluation of Army Corps Food Supply System Using Simulation	1110
Ozan Pembe and Ihsan Sabuncuoglu	
The use of Recursive Simulation to Support Decisionmaking	1116
John B. Gilmer, Jr. and Frederick J. Sullivan	

Contents

Manufacturing Applications

New Manufacturing Modeling Methodology

A Hybrid Approach to Manufacturing Enterprise Simulation	1125
Luis Rabelo, Magdi Helal, Young-Jun Son, Albert Jones, Jason Min, and Abhijit Deshmukh	
Deterministic and Stochastic Dynamic Modeling of Continuous Manufacturing Systems Using Analogies to Electrical Systems	1134
Bashar H. Sader and Carl D. Sorensen	
Data Driven Design and Simulation System based on XML	1143
Guixiu Qiao, Frank Riddick, and Charles McLean	

Distributed Simulation in Manufacturing

Automobile Manufacturing Supply Chain Simulation in the GRIDS Environment	1149
Gary Tan, Na Zhao, and Simon J.E. Taylor	
EPOCHS: Integrated Commercial Off-the-Shelf Software for Agent-Based Electric Power and Communication Simulation	1158
Kenneth M. Hopkinson, Kenneth P. Birman, Renan Giovanini, Denis V. Coury, Xiaoru Wang, and James S. Thorp	
Simulation of Distributed Manufacturing Enterprises: A New Approach	1167
Sameh M. Saad, Terrence Perera, and Ruwan Wickramarachchi	

Simulation Test Bed for Manufacturing Analysis

A Simulation Test Bed for Production and Supply Chain Modeling	1174
S. T. Enns and Pattita Suwanruji	
Benchmarking of a Stochastic Production Planning Model in a Simulation Testbed	1183
German Riaño, Szu Hui Ng, Richard Serfozo, Steven Hackman, Lai Peng Chan, and Peter Lendermann	
Comparison of Bottleneck Detection Methods for AGV Systems	1192
Christoph Roser, Masaru Nakano, and Minoru Tanaka	

Simulation in Automotive Industries

Reducing Human Error in Simulation in General Motors	1199
Demet Wood and Echo A. Harger	
Paint Line Color Change Reduction in Automobile Assembly through Simulation	1204
Yong-Hee Han, Chen Zhou, Bert Bras, Leon McGinnis, Carol Carmichael, and P.J. Newcomb	
Using Empirical Evidence of Variations in Worker Performance to Extend the Capabilities of Discrete Event Simulations in Manufacturing	1210
Tim Baines, Linda Hadfield, Steve Mason, and John Ladbrook	

Manufacturing Case Studies

Generic Case Studies for Manufacturing Simulation Applications	1217
Charles McLean and Guodong Shao	
Simulation Modeling for Quality and Productivity in Steel Cord Manufacturing	1225
Can H. Turkseven and Gürdal Ertek	
NIST XML Simulation Interface Specification at Boeing: A Case Study	1230
Roberto F. Lu, Guixiu Qiao, and Charles McLean	

Contents

Manufacturing Analysis and Control

Buffer Allocation Model based on a Single Simulation	1238
Christoph Roser, Masaru Nakano, and Minoru Tanaka	
Shared Resource Capacity Analysis in Biotech Manufacturing	1247
Prasad V. Saraph	
Behavior of an Order Release Mechanism in a Make-to-Order Manufacturing System with Selected Order Acceptance	1251
Amitava Nandi and Paul Rogers	

Simulation Optimization in Manufacturing Analysis

A Simulation-Optimization Approach Using Genetic Search for Supplier Selection	1260
Hongwei Ding, Lyès Benyoucef, and Xiaolan Xie	
Simulation based Optimization for Supply Chain Configuration Design	1268
Tu Hoang Truong and Farhad Azadivar	
Incorporating Fuzzy Logic Admission Control in Simulation Models	1276
Qisheng Le and Gerald M. Knapp	

Neutral Information Structure for Manufacturing Simulations

Designing Reusable Simulation Modules for Electronics Manufacturing Systems	1281
Phani S. Mukkamala, Jeffrey S. Smith, and Jorge F. Valenzuela	
Information Structure to Support Discrete Event Simulation in Manufacturing Systems	1290
Björn Johansson, Joacim Johnsson, and Anders Kinnander	
A Neutral Information Model for Simulating Machine Shop Operations	1296
Y. Tina Lee, Charles McLean, and Guodong Shao	

Supply Chain Simulation

Distributed Supply Chain Simulation Using a Generic Job Running Framework	1305
Haifeng Xi, Heng Cao, Leonard Berman, and David Jensen	
A Simulation-Based Tool for Inventory Analysis in a Server Computer Manufacturing Environment	1313
Heng Cao, Feng Cheng, Haifeng Xi, Markus Ettl, Stephen Buckley, and Carlos Rodriguez	
A Bayesian Framework for Modeling Demand in Supply Chain Simulation Experiments	1319
David F. Muñoz	

Semiconductor Manufacturing

Factory Scheduling and Dispatching

Constant Time Interval Production Planning with Application to WIP Control in Semiconductor Fabrication	1329
Kazuo Miyashita, Kazuyuki Senoh, Hiroyuki Ozaki, and Hirofumi Matsuo	
Simulation-Based Assessment of Batching Heuristics in Semiconductor Manufacturing	1338
Lars Mönch and Ilka Habenicht	
Accelerating Products under Due-Date Oriented Dispatching Rules in Semiconductor Manufacturing	1346
Oliver Rose	

Automated Material Handling Systems

A Simulation-Based Design Framework for Automated Material Handling Systems in 300mm Fabrication Facilities	1351
Dima Nazzal and Douglas A. Bodner	

Contents

Automated Reticle Handling: A Comparison of Distributed and Centralized Reticle Storage and Transport	1360
Anne M. Murray and David J. Miller	
An Approach to Robust Layout Planning of AMHS	1366
Roland Sturm, Joachim Seidelmann, Johann Dörner, and Kevin Reddig	
<i>Factory Capacity and Throughput Planning</i>	
Conceptualization, Design and Implementation of a Static Capacity Model	1373
Orkun Ozturk, Melissa Boom Coburn, and Steve Kitterman	
Indirect Estimation of Cycle Time Quantiles from Discrete Event Simulation Models Using the Cornish-Fisher Expansion	1377
Jennifer E. McNeill, Gerald T. Mackulak, and John W. Fowler	
Discrete-Event Simulation Using SystemC: Interactive Semiconductor Factory Modeling with FabSim	1383
Holger Vogt	
<i>Process Equipment Modeling</i>	
Making Optimal Design Decisions for Next Generation Dispensing Tools	1388
Brian P. Prescott and Todd LeBaron	
Application of Cluster Tool Modeling to a 300 mm Fab Simulation	1394
Sameer T. Shikalgar, David Fronckowiak, and Edward A. MacNair	
Resident-Entity based Simulation of Batch Chamber Tools in 300mm Semiconductor Manufacturing	1398
Nirmal Govind and David Fronckowiak	
<i>Simulation-Based Scheduling</i>	
<i>Supply Chain Planning</i>	
Rolling Horizon Scheduling of Multi-Factory Supply Chains	1409
Eunkyoung G. Cho, Kristin A. Thoney, Thom J. Hodgson, and Russell E. King	
A Reinforcement Learning Approach to Production Planning in the Fabrication/Fulfillment Manufacturing Process	1417
Heng Cao, Haifeng Xi, and Stephen F. Smith	
Theory and Practice of Advanced Planner and Optimizer in Supply Chain Domain	1424
Sam Bansal	
<i>Factory Scheduling</i>	
Simulation based Scheduling Using a Two-Pass Approach	1433
Chin Soon Chong, Appa Iyer Sivakumar, and Robert Gay	
Implementing a Simulation-Based Scheduling System for a Two-Plant Operation	1440
Jeffrey A. Joines, Andrew W. Sutton, Kristin Thoney, Russell E. King, and Thom J. Hodgson	
Simulation-Based Finite Scheduling at Albany International	1449
Juha-Matti Lehtonen, Patrik Appelqvist, Teemu Ruohola, and Ilkka Mattila	
<i>Dynamic Scheduling I</i>	
Real-Time Decision Making Using Simulation	1456
Mukesh Dalal, Brett Groel, and Armand Prieditis	
Simulation-Based Scheduling for Dynamic Discrete Manufacturing	1465
Chin Soon Chong, Appa Iyer Sivakumar, and Robert Gay	

Contents

Use of Discrete Event Simulation to Analyze Dispatch Policies of an Equipment Group in Semiconductor Fab	1474
Raja Sunkara and Ramesh Rao	
<i>Dynamic Scheduling II</i>	
Look-Ahead Strategies for Controlling Batch Operations in Industry – An Overview	1480
Durk-Jouke van der Zee	
SIMUL8-Planner Simulation-Based Planning and Scheduling	1488
Kieran H. Concannon, Kim I. Hunter, and Jillian M. Tremble	
Fast Simulation Model for Grid Scheduling Using HyperSim	1494
Sugree Phatanapherom, Putchong Uthayopas, and Voratas Kachitvichyanukul	
Construction Engineering and Project Management	
<i>Construction Engineering and Project Management I</i>	
A Construction Process Simulation Web Service	1503
Daniel W. Halpin, Henry Jen, and Jungwuk Kim	
Building a Virtual Shop Model for Steel Fabrication	1510
Lingguang Song and Simaan M. AbouRizk	
Variable-Speed Resource Motion in Animations of Discrete-Event Process Models	1518
Vineet R. Kamat and Julio C. Martinez	
<i>Construction Engineering and Project Management II</i>	
Impact of Multitasking and Merge bias on Procurement of Complex Equipment	1527
Jan A. Elfving and Iris D. Tommelein	
An Application of Lean Concepts and Simulation for Drainage Operations Maintenance Crews	1534
Albert Agbulos and Simaan M. AbouRizk	
Agent-Based Modeling and Simulation in Construction	1541
Anil Sawhney, Howard Bashford, Kenneth Walsh, and Ajith Rao Mulky	
<i>Construction Engineering and Project Management III</i>	
Simulation of the Residential Lumber Supply Chain	1548
Kenneth D. Walsh, Anil Sawhney, and Howard H. Bashford	
Reasoning about Actions and Events in Situational Simulations	1552
Amlan Mukherjee and Eddy M. Rojas	
Monte Carlo Simulation for Schedule Risks	1561
Brenda McCabe	
Applications in Logistics, Transportation, and Distribution	
<i>Strategy Simulations</i>	
Tutorial on Business and Market Modeling to Aid Strategic Decision Making: System Dynamics in Perspective and Selecting Appropriate Analysis Approaches	1569
Donna D. Mayo and Knud Erik Wichmann	
Steering Strategic Decisions at London Underground: Evaluating Management Options with System Dynamics	1578
Donna D. Mayo, William J. Dalton, and Martin J. Callaghan	

Contents

Supply Chain and Distribution Network

Simulation – A Key Tool to Accelerate and Add Confidence to Postal Network Configuration	1585
Niels Erik Larsen	
Semiconductor Supply Network Simulation	1593
Gary W. Godding, Hessam S. Sarjoughian, and Karl G. Kempf	
Railroad Simulator on Closed Loop	1602
Luis Augusto Gago Franzese, Marcelo Moretti Fioroni, and Rui Carlos Botter	

Supply Chain Management Simulation

Modelling a Continuous Process with Discrete Simulation Techniques and its Application to LNG Supply Chains	1607
Niels Stchedroff and Russell C. H. Cheng	
A Prototype Object-Oriented Supply Chain Simulation Framework	1612
Manuel D. Rossetti and Hin-Tat Chan	
Initializing a Distribution Supply Chain Simulation with Live Data	1621
Malay A. Dalal, Henry Bell, Mike Denzien, and Michael P. Keller	

Modeling People Flow

Simulation Analysis of International-Departure Passenger Flows in an Airport Terminal	1627
Soemon Takakuwa and Tomoki Oyama	
Online Simulation of Pedestrian Flow in Public Buildings	1635
André Hanisch, Juri Tolujew, Klaus Richter, and Thomas Schulze	
Development and Validation of a Flexible, Open Architecture, Transportation Simulation	1642
Michael Hunter and Randy Machemehl	

Simulation of Airports/Aviation Systems

Total Airport and Airspace Model (TAAM) Parallelization Combining Sequential and Parallel Algorithms for Performance Enhancement	1650
Neera Sood and Frederick Wieland	
Discrete Event Simulation Model for Airline Operations: SIMAIR	1656
Loo Hay Lee, Huei Chuen Huang, Chulung Lee, Ek Peng Chew, Wikrom Jaruphongs, Yean Yik Yong, Zhe Liang, Chun How Leong, Yen Ping Tan, Kalyan Namburi, Ellis Johnson, and Jerry Banks	
Simulating Aircraft Delay Absorption	1663
Justin Boesel	

Simulation Planning and Rostering

Runway Schedule Determination by Simulation Optimization	1670
Thomas Curtis Holden and Frederick Wieland	
A Simulation Approach to Manpower Planning	1677
Massoud Bazargan-Lari, Payal Gupta, and Seth Young	
A Discrete Event Simulation for the Crew Assignment Process in North American Freight Railroads	1686
Rainer Guttkuhn, Todd Dawson, Udo Trutschel, Jon Walker, and Mike Moroz	

Traffic and Road Planning Simulation

Simulation of Freeway Merging and Diverging Behavior	1693
Daiheng Ni, John D. Leonard and II	

Contents

Modeling Ambulance Service of the Austrian Red Cross	1701
Othmar Koch and Heinz Weigl	
Simulation Modelling in Support of Emergency Fire-Fighting in Norfolk	1707
Alan C. Cowdale	
<i>Freight Simulation</i>	
Dynamic Freight Traffic Simulation Providing Real-Time Information	1711
Jinghua Xu, Kathleen L. Hancock, and Frank Southworth	
The Modal-Shift Transportation Planning Problem and its Fast Steepest Descent Algorithm	1720
Masami Amano, Takayuki Yoshizumi, and Hiroyuki Okano	
A Monte Carlo Simulation Approach to the Capacitated Multi-Location Transshipment Problem	1729
Deniz Özdemir, Enver Yücesan, and Yale T. Herer	
<i>Waterway, Shipping, and Ports</i>	
Modeling Ship Arrivals in Ports	1737
Eelco van Asperen, Rommert Dekker, Mark Polman, and Henk de Swaan Arons	
Optimization of a Barge Transportation System for Petroleum Delivery	1745
Nicholas P. Anderson, Gerald W. Evans, William E. Biles, and Todd C. Whyte	
Iterative Optimization and Simulation of Barge Traffic on an Inland Waterway	1751
Amy Bush, W. E. Biles, and G. W. DePuy	
Business Process Modeling/Reengineering	
<i>The Role of Special Agents in Today's World</i>	
Agent-Based Modeling and Simulation of Store Performance for Personalized Pricing	1759
Cem Baydar	
Combining Agent-Based Supply Net Simulation and Constraint Technology for Highly Efficient Simulation of Supply Networks Using APS Systems	1765
Hartwig Baumgaertel and Ulrich John	
Simulating Agent Intelligence as Local Network Dynamics and Emergent Organizational Outcomes	1774
James K. Hazy and Brian F. Tivnan	
<i>The Process of Process Reengineering</i>	
Visualization of Probabilistic Business Models	1779
Lev Virine and Lisa Rapley	
Simulation for Business Processes and Information Systems Design	1787
Ray J. Paul and Alan Serrano	
Integration of Discrete Event Simulation Models with Framework-Based Business Applications	1797
Peter Lendermann, Nirupam Julka, Lai Peng Chan, and Boon Ping Gan	
<i>Customer Relations Management: Call Center Operations</i>	
Modelling and Simulation of a Telephone Call Center	1805
Juta Pichitlamken, Alexandre Deslauriers, Pierre L'Ecuyer, and Athanassios N. Avramidis	
Routing Heuristics for Multi-Skill Call Centers	1813
Ger Koole, Auke Pot, and Jérôme Talim	

Contents

Fluid Approximations for a Priority Call Center with Time-Varying Arrivals	1817
Ahmad D. Ridley, Michael C. Fu, and William A. Massey	
Customer Relations Management: Service Operations	
Using Simulation to Approximate Subgradients of Convex Performance Measures in Service Systems	1824
Július Atlason, Marina A. Epelman, and Shane G. Henderson	
Simulation's Role in Baggage Screening at the Airports: A Case Study	1833
Suna Hafizogullari, Gloria Bender, and Cenk Tunasar	
Human Fatigue Risk Simulations in 24/7 Operations	1838
Rainer Guttkuhn, Udo Trutschel, Anneke Heitmann, Acacia Aguirre, and Martin Moore-Ede	
Process Improvement	
Optimization of a Telecommunications Billing System	1843
Mark Schouwenaar and Eleazer Martin	
One Size Fits All? Segmenting Customer base for Maximum Returns	1848
Roar Grønhaug, Eleazer Martin, and Per-Åge Bæra	
Simulations on .Net Using Highpoint's HighMAST™ Simulation Toolkit	1852
Peter C. Bosch	
Health Care	
Public Health	
Emergency Management: Capability Analysis of Critical Incident Response	1863
Thomas F. Brady	
Computer Simulation of a Mobile Examination Center	1868
Vera Z. Osidach and Michael C. Fu	
Proposals to Reduce Over-Crowding, Lengthy Stays and Improve Patient Care: Study of the Geriatric Department in Norway's Largest Hospital	1876
Eleazer Martin, Roar Grønhaug, and Kristin Haugene	
Healthcare Process Analysis	
A Methodology for Modeling Front Office and Patient Care Processes in Ambulatory Health Care	1882
Bradley P. Morrison and Barbara C. Bird	
The use of Simulation to Evaluate Hospital Operations between the Emergency Department and a Medical Telemetry Unit	1887
Ruby E. Blasak, Wendy S. Armel, Darrell W. Starks, and Mary C. Hayduk	
Redesigning the Medication Ordering, Dispensing, and Administration Process in an Acute Care Academic Health Science Centre	1894
Cathy Wong, Glen Geiger, Yaron D. Derman, Carolyn R. Busby, and Michael W. Carter	
Emergency Departments I	
The use of Simulation and Design of Experiments for Estimating Maximum Capacity in an Emergency Room	1903
Felipe F. Baesler, Hector Jahnsen, and Mahal DaCosta	
The use of Simulation to Reduce the Length of Stay in an Emergency Department	1907
Simon Samaha, Wendy S. Armel, and Darrell W. Starks	
Using Simulation in the Architectural Concept Phase of an Emergency Department Design	1912
Allan Wiinamaki and Rainer Dronzek	

Contents

Emergency Departments II

Pairing Emergency Severity Index5-Level Triage Data with Computer Aided System Design to Improve Emergency Department Access and Throughput	1917
S. Mahapatra, C. P. Koelling, L. Patvivatsiri, B. Fraticelli, D. Eitel, and L. Grove	
Simulating Six Sigma Improvement Ideas for a Hospital Emergency Department	1926
Martin J. Miller, David M. Ferrin, and Jill M. Szymanski	
A Simulation-ILP based Tool for Scheduling ER Staff	1930
Martha A. Centeno, Ronald Giachetti, Richard Linn, and Abdullah M. Ismail	

Simulation Education

Teaching the Classics of Simulation to Beginners, Panel

Teaching the Classics of Simulation to Beginners (Panel)	1941
Ingolf Ståhl, Henry Herper, Raymond R. Hill, Catherine M. Harmonosky, Joan M. Donohue, and W. David Kelton	

Simulation Textbooks – Old and New, Panel

Simulation Text Books – Old and New (Panel)	1952
Thomas J. Schriber, Ingolf Ståhl, Jerry Banks, Averill M. Law, Andrew F. Seila, and Richard G. Born	

Introductory Teaching of Simulation

Teaching Discrete Event Simulation to Business Students: The Alpha and Omega	1964
Richard G. Born	
Modeling and Simulation in High School Education – Two European Examples	1973
Henry Herper and Ingolf Ståhl	
Designing Simulation Projects	1982
Melanie L. Hatch and Donald L. Byrnett	

Perspectives on Simulation in Education and Training

Simulation Education is No Substitute for Intelligent Thinking	1989
Ray J. Paul, Tillal Eldabi, and Jasna Kuljis	
Simulation Models as an Aid for the Teaching and Learning Process in Operations Management	1994
Leonardo Chwif and Marcos Ribeiro Pereira Barretto	
Virtual Environments for the Training of Maintenance and Service Tasks	2001
Eberhard Bluemel, Axel Hintze, Torsten Schulz, Marco Schumann, and Stefan Stuerling	

Future of Simulation

Role of WSC in Simulation, Panel

Panel Session: The Future of the Winter Simulation Conference	2011
Daniel T. Brunner, James O. Henriksen, Ricki G. Ingalls, Mani S. Manivannan, Barry L. Nelson, and Cindy Schiess	

Simulation Standards: Current Status, Needs, Future Directions, Panel

Simulation Standards: Current Status, Needs, and Future Directions	2019
Charles McLean, Swee K. Leong, Charley Harrell, Philomena M. Zimmerman, and Roberto F. Lu	

Contents

Determining the ROI for Simulation, Panel

Increasing Return on Investment from Simulation (Panel)	2027
Randall Gibson, D. J. Medeiros, Andrew Sudar, Bill Waite, and Matthew W. Rohrer	

Future of the Simulation Industry, Panel

The Future of the Simulation Industry	2033
Jerry Banks, Joseph C. Hagan, Peter Lendermann, Charles McLean, Ernest H. Page, C. Dennis Pegden, Onur Ulgen, and James R. Wilson	

Simulation Technology Panel

Panel: Simulation – Past, Present and Future	2044
Russell R. Barton, Paul A. Fishwick, James O. Henriksen, Robert G. Sargent, and Janet M. Twomey
